2008 Second Quarter Pretreatment Report

Dear Mr. Gross:

This quarterly report is submitted in accordance with Waste Discharge Requirements R5-2008-0033.

### List of Industrial Users not achieving Compliance

For the purposes of this report, industrial users are described as those users categorized as Class 1A dischargers.

Calpine, Air Products, Rio Bravo, PPG, Stratas

**RECEIVED**

Industrial users inconsistency achieving compliance:

MAY 07 2012

N/A

RWQCB-CVR  
FRESNO, CALIF.

Industrial users with significant violations to applicable pretreatment requirements as defined in 40 CFR 403.8 (f) (2) (vii):

N/A

Industrial users that complied with a schedule to achieve compliance (include the date final compliance is required):

N/A

**RECEIVED**

MAY 07 2012

MONITORING REPORT REVIEW

### Commercial/Industrial Users

Engineer \_\_\_\_\_

Compliance \_\_\_\_\_  
Yes No

### Class II

Date Reviewed \_\_\_\_\_

Most of the non-residential wastewater dischargers are warehouse or office commercial enterprises. Those facilities generally include administration staff and possible warehousing of products. Minimal specific monitoring or reporting requirements have been identified for those sites.

Several dischargers have facilities that require grease traps, sediment separators, or oil/water separators as pretreatment improvements. Examples of these facilities include a car wash, truck wash, and a trucking operation. Monitoring and reporting includes inspection of the pretreatment facilities approximately one time per year and reporting of waste hauling activities by the discharger.

### Class I

The remaining facilities are industrial in nature and require more comprehensive monitoring and reporting programs. These facilities include a plate glass production plant, biomass cogeneration plant, and oil products processor.

Class I dischargers include:

<u>Dischargers</u>	<u>Permit No.</u>
Smurfit	1001
Air Products and Chemicals, Inc.	1140
PPG Industries	1038
Rio Bravo Fresno	1005
Stratas Foods	1008

Industrial users inconsistently achieving compliance:

Fresno Truck Wash. The District has issued an Administrative Complaint. Fresno Truck Wash has constructed improvements and is in the process of testing the facilities for performance.

Industrial users with significant violations to applicable pretreatment requirements as defined in 40 CFR 403.8 (f) (2) (vii):

Fresno Truck Wash. The District has issued an Administrative Complaint. Fresno Truck Wash has constructed improvements and is in the process of testing the facilities for performance.

### MONITORING REPORT REVIEW

Engineer ASP  
Compliance Yes X no  
Date Reviewed 4/25/12

Industrial users inconsistently achieving compliance:

Fresno Truck Wash. The District has issued an Administrative Complaint. Fresno Truck Wash has constructed improvements and is in the process of testing the facilities for performance. A field review of the pretreatment improvements has been conducted. Improvement in the discharge has been identified. Additional improvements have been identified by the owner of the facilities to bring the site into compliance.

Industrial users with significant violations to applicable pretreatment requirements as defined in 40 CFR 403.8 (f) (2) (vii):

Fresno Truck Wash. The District has issued an Administrative Complaint. Fresno Truck Wash has constructed improvements and is in the process of testing the facilities for performance.

Industrial users that complied with a schedule to achieve compliance (include the date final compliance is required):

Fresno Truck Wash. The District has issued an Administrative Complaint. Fresno Truck Wash has constructed improvements and is in the process of testing the facilities for performance.

Industrial users that did not achieve compliance and are not on a compliance schedule:

N/A

Industrial users with an unknown compliance status:

N/A

The District has added staff and has increased the monitoring of commercial and industrial facilities. Sites visited recently include Kinder Morgan, Inland Star, Fifth Wheel Truck Wash, RockTenn, PPG, Rio Bravo, Stratas Foods, Fresno Truck Wash, Paul Everts RV, GreenTec, Sterling Coatings, and Crop Production Services. Reductions of electroconductivity in individual discharges has been a result of the increased monitoring efforts.

Respectfully,

Russ Holcomb

Re: Malaga County Water District  
2012 Second Quarter Pretreatment Report

Dear Mr. Gross:

This quarterly report is submitted in accordance with Waste Discharge Requirements R5-2008-0033.

### Commercial/Industrial Users

#### Class II

Most of the non-residential wastewater dischargers are warehouse or office commercial enterprises. Those facilities generally include administration staff and possible warehousing of products. Minimal specific monitoring or reporting requirements have been identified for those sites.

Several dischargers have facilities that require grease traps, sediment separators, or oil/water separators as pretreatment improvements. Examples of these facilities include a car wash, truck wash, and a trucking operation. Monitoring and reporting includes inspection of the pretreatment facilities approximately one time per year and reporting of waste hauling activities by the discharger.

#### Class I

The remaining facilities are industrial in nature and require more comprehensive monitoring and reporting programs. These facilities include a plate glass production plant, biomass cogeneration plant, and oil products processor.

Class I dischargers include:

Dischargers	Permit No.
RockTenn	1001
Air Products and Chemicals, Inc.	1140
PPG Industries	1038
Rio Bravo Fresno	1005
Stratas Foods	1008

DATE RECEIVED \_\_\_\_\_  
BY \_\_\_\_\_  
DATE REVIEWED \_\_\_\_\_

Industrial users inconsistently achieving compliance:

Fresno Truck Wash. The District has issued an Administrative Complaint. Fresno Truck Wash has constructed improvements and continues to make improvements to the facilities for performance. A couple of field reviews of the pretreatment improvements have been conducted. Improvement in the discharge has been identified. Additional improvements have been identified by the owner of the facilities to bring the site into compliance. Improvements include changes to soaps and chemicals used in the pretreatment process.

Industrial users with significant violations to applicable pretreatment requirements as defined in 40 CFR 403.8 (f) (2) (vii):

Fresno Truck Wash. The District has issued an Administrative Complaint. Fresno Truck Wash has constructed improvements and is in the process of testing the facilities for performance.

Industrial users that complied with a schedule to achieve compliance (include the date final compliance is required):

Fresno Truck Wash. The District has issued an Administrative Complaint. Fresno Truck Wash has constructed improvements and is in the process of testing the facilities for performance.

Industrial users that did not achieve compliance and are not on a compliance schedule:

N/A

Industrial users with an unknown compliance status:

N/A

The District has added staff and has increased the monitoring of commercial and industrial facilities. Sites visited recently include Kinder Morgan, Inland Star, Fifth Wheel Truck Wash, RockTenn, Rio Bravo, Fresno Truck Wash, GreenTec, and Sterling Coatings. Reductions of electroconductivity in individual discharges has been a result of the increased monitoring efforts.

Respectfully,

Russ Holcomb  
General Manager
